

# Dynamic Constructivism: a comparison with themes from Hermann Weyl's philosophy of mathematics

Laura Crosilla  
University of Florence

## **Abstract**

In this talk I will compare specific aspects of Giovanni Sambin's dynamic constructivism with key points from Hermann Weyl's philosophy of mathematics. Hermann Weyl also put forth a distinctive, broad form of constructivism. As we will see, there are some affinities, but also differences between the two forms of constructivism.
