

BOUNDEDNESS PROPERTIES OF BESSEL-RIESZ OPERATORS  
ON MORREY SPACES

**Abstract.** In this talk, we discuss the boundedness properties of Bessel-Riesz operators on (generalized) Morrey spaces. We show that the norm of such an operator is dominated by the norm of its kernel. The proof uses the usual dyadic decomposition, a Hedberg-type inequality for the operators, and the boundedness of Hardy-Littlewood maximal operator.
